Why Reddit?

Reddit is one of the most cost-effective channels for building long-term, high-quality traffic.

Reddit is the #1 source cited by ChatGPT. Studies show Reddit is cited 6x more than X (Twitter), 10x more than YouTube, and 100x more than Instagram in AI-generated answers. This makes Reddit the single most important platform for GEO (Generative Engine Optimization).

Reddit has massive direct traffic. With 4 billion monthly visits, Reddit rivals X (4.3B) and approaches Instagram (6.5B). Unlike other platforms, Reddit users actively seek recommendations and solutions.

Reddit marketing delivers both GEO and social media effects:

- Build social proof and authentic brand reputation
- Improve AI search engine visibility (ChatGPT, Google AI Overview, Perplexity)
- Create genuine, positive user reviews and discussions
- Reddit posts frequently appear on Google's first page and are cited by ChatGPT
- Drive direct traffic from engaged communities
